Stay Alive

Oh, your fingers were crossed behind your back Before you ever gave me a chance But now I have learned to trust myself And I don't need anyone else No one's here to light the candle No one's here to light the way It's something I will have to handle My way I've got to open up my eyes And find a way to kill the boredom I watch the time go by Now it's time for me to get mine Out of room, out of places to hide Backed up in the corner I know I will stay alive Out of room, out of places to hide Backed up in the corner I know I will stay alive The lights are still on And I am still here there's nothing left to fear A vision I've seen, a fire will burn No longer will I wait my turn No one's here to light the candle No one's here to light the way It's something I will have to handle My way I've got to open up my eyes And find a way to kill the boredom I watch the time go by And now it's time for me to get mine Out of room, out of places to hide Backed up in the corner I know I will stay alive Out of room, out of places to hide Backed up in the corner I know I will stay alive Stay alive Stay alive This time, this time It's time for me to get mine Out of room, out of places to hide Backed up in the corner I know I will stay alive Out of room, out of places to hide Backed up in the corner I know I will stay alive I will stay alive, I will stay alive I will stay alive, I will stay alive
