

# Heart of Courage

## Two Steps from Hell

The promise  
Redemption  
This time we fight for freedom

The dreamer  
Awaking  
Shattered by love

The Courage  
Together  
We lean against destruction

Solvation  
Remission  
Wait, my new world...

We take it, we save it  
Our hearts unite each other  
The one who dies with you  
Follow your path, soldier

We face it, we break it  
Until our last breath fading  
Whatever, don't matter  
Burning love for Gaia...

The sanctum  
Protective  
With my hands I will save it

Companion  
Believer  
Those who are gone

The precious  
Endearing  
Your eyes are cold and rigid

Who knows who  
can stop this  
My beloved child

We show it, we hide it  
The fears are long forgotten  
This battle, pulsating  
Blood on your way, soldier

We want it, we get it  
We live inside this circle  
Deliver, Consider  
Take me, holy mother
