

London Fog (my 20th Anniversary Tribute To You)

Vickie Winans

London fog makes me feel so lonely
London fog makes me feel so blue
That's how life would be
If you should ever leave
It's a london fog without your love
It's a london fog without your love

London rain makes me feel so helpless
So much pain in ever drop of dew
And that's how life would be
If should up and leave
It's a london rain without your love
Such a constant pain without your love

Like london bridges falling down
My heart would fail if you should go
With every passing day i'd cry
Life for me would be no more
If you were to say you're going away
I would just sit and sob
And life would be london fog

Now if you were to say you're going away
I would just sit and sob
And life would be
London fog

Makes me feel so angry
There's no joy or happiness in view
And that's how life would be
If you stopped loving me
It's a london fog without your love
It's a london fog without your love
Without your love
