## **The Sound Of Revolution**

The sound of revolution

It's coming again from the streets A lion's roar, a tribal beat It's time for you to give a hand And fight the battle to the promised land

The sound of revolution

The youth are getting restless But now there's many more Living in the streets Times are worse than before Now you know it's time to make a move If you do nothing, then you all lose

The sound of revolution

The line's been drawn, the battle's clear It's time for pride and no more fear The revolution now is in your heart And together we have a part

The sound of revolution

## Warzone
