

## Social Fears

Watchtower

In the system of humanity  
Spreads a prejudiced disease  
The suppression of each generation  
By the previous ideology  
To voice their opposition  
To our ever-advancing culture  
In varying forms of objection  
Yet we continue to progress -  
We must

Social fears  
Fears of the righteous  
We will fight their fatuous ideals  
Social fears  
Fears of the righteous  
Smash down the walls that they erect and crush the restrictions

Social fears  
Fears of the righteous  
We will fight their fatuous ideals  
Social fears  
Fears of the righteous  
Smash down the walls that they erect and crush the restrictions

In guise of political conservative  
Or evangelical saint  
The epitome of corruption  
They become most dangerous  
When legislative power is granted

They make laws of their morals  
We must prove ourselves as formidable enemies  
To this injustice and defend our civil freedom  
The moral majority are victims of social fears
